

DESIGN THAT OPENS UP YOUR SPACE

WELCOME

Welcome to the world of Deepo – where steel and glass meet design to create tailor-made loft-style doors and partitions for your projects. Our mission is to support your creative vision by providing individually customized solutions that fit both your client's needs and the character of each interior.

Together, we create spaces where aesthetics meet functionality.

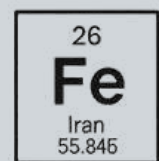

ABOUT

Deepo specializes in the design and manufacture of loft-style steel and glass doors and partitions. Each product is made to measure from the highest-quality materials, ensuring a perfect fit for every interior. The company emphasizes an individual approach, combining modern design, functionality, and durability.

It features:

- Ultra-slim 0.79 inch visible profiles
- Steel frames made with CNC precision
- Standard and metallic finish palette
- Range of clear and ornament glass (up to 0.31 inch)
- Stick-on and welded bars in custom pattern

OUR VISION

At Deepo, we believe that loft-style doors and partitions are more than just elements of interior design – they are a way of shaping space, adding character and expressing individuality.

Our vision is to deliver solutions that seamlessly combine aesthetics and functionality, inspiring architects to design interiors filled with light, harmony, and modern elegance.

We strive to be a trusted partner for architects and designers, providing not only high-quality products but also comprehensive support throughout the creative process. Every project is treated individually - because we believe that unique interiors deserve unique solutions.

OUR MISSION

Our mission is to create loft-style doors and partitions that combine modern design with functionality and durability. Each product is custom-made to perfectly meet the needs of architects, designers, and clients.

We strive to support architects in bringing their visions to life, by offering solutions that simplify the design process and enhance every interior. Our doors and partitions are not just about dividing space - they are about shaping and inspiring it.

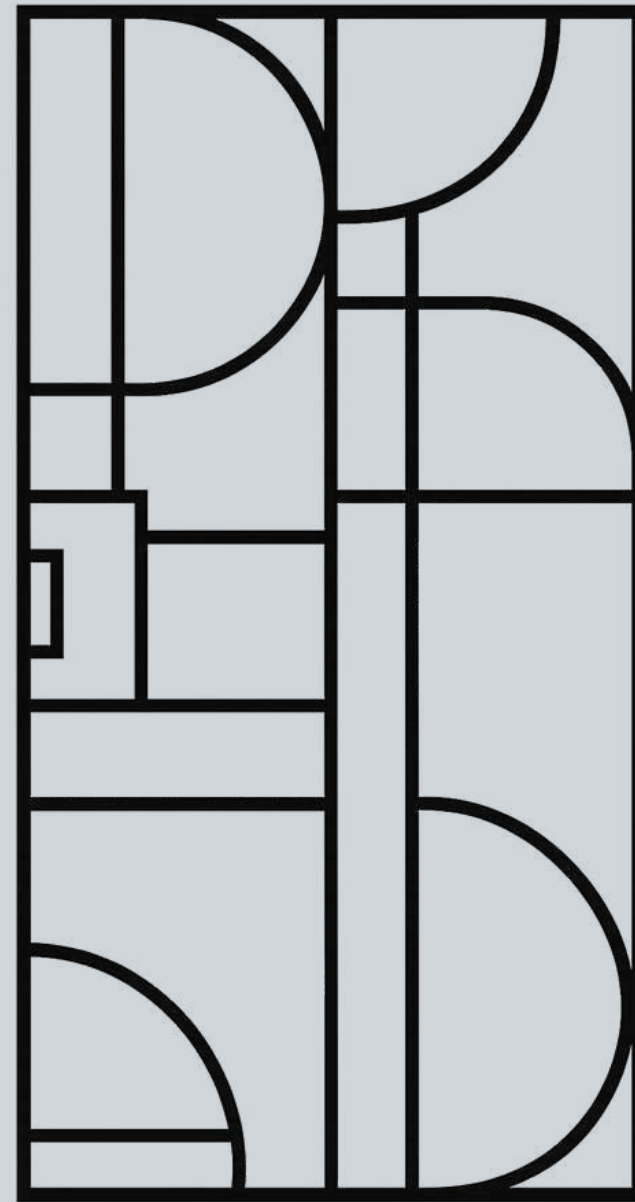

WHAT MAKES US UNIQUE

- **Made to measure** – every project is individually tailored to the needs of the architect and client.
- **Minimalist design** – ultra-slim 0.79-inch profiles and elegant grid patterns.
- **Variety of solutions** – hinged, double, sliding, pivot, arched, and folding doors, as well as full glass partitions.
- **Personalization** – a wide selection of glass types, colors, handles, and design details.
- **Quality and durability** – certified steel, hand-welded frames, and a powder-coated finish.
- **Architect support** – fast quotations, technical advice, and full assistance throughout the order process.

More than a product
it's a mindset shaped by architecture.

You design the form. We build the precision.

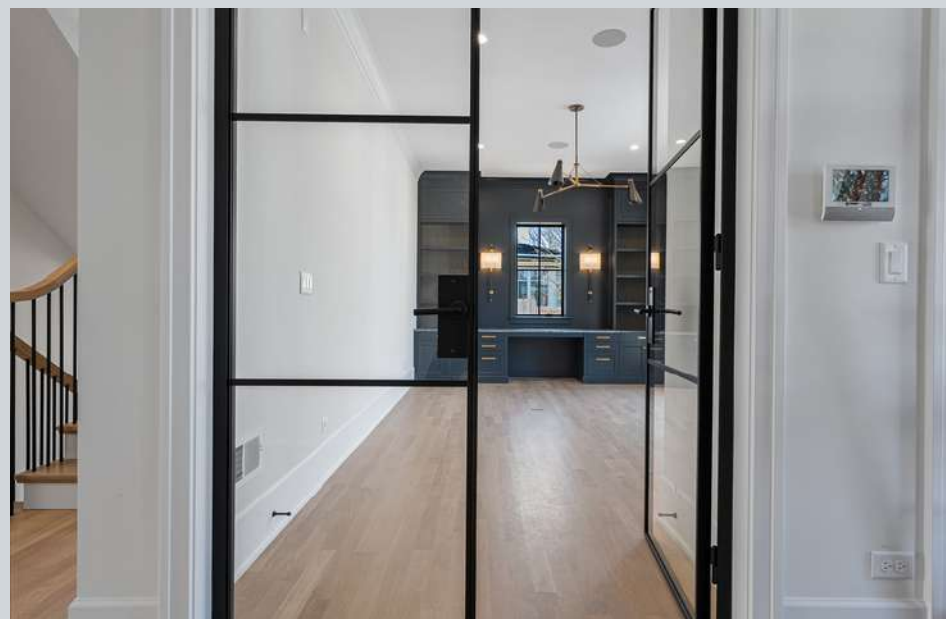

APPLICATIONS

Deepo loft-style doors and partitions are perfect for a wide range of interiors:

- **Residential spaces** – elegant zone divisions such as living room–kitchen, bedroom–walk-in closet, home office.
- **Offices** – modern conference rooms, private offices, and open space layouts.
- **Restaurants and hotels** – design-driven solutions that highlight the unique character of the space while maintaining full functionality.
- **Showrooms and boutiques** – loft doors and partitions that make a statement of exclusive design.
- **Public spaces** – interiors where aesthetics, durability, and safety are equally important.

LOFT SLIM PROFILE SYSTEM

Profile System Dimensions

	width	height
door leaf	1.57 inch	0.79 inch
door frame	1.97 inch	0.79 inch
total set leaf + door fraame	1.97 inch	1.73 inch

Profile System Characteristic

parameter	characteristic
frame material	steel
finish	powder coating
glazing bead material	aluminum
glazing bead mount	mechanical klik-on
glass range	0.16 - 0.31 inch
hinges	welded
joint	welded
bars	construction steel or aluminum stick -on

LOFT SLIM swing doors

Swing Doors

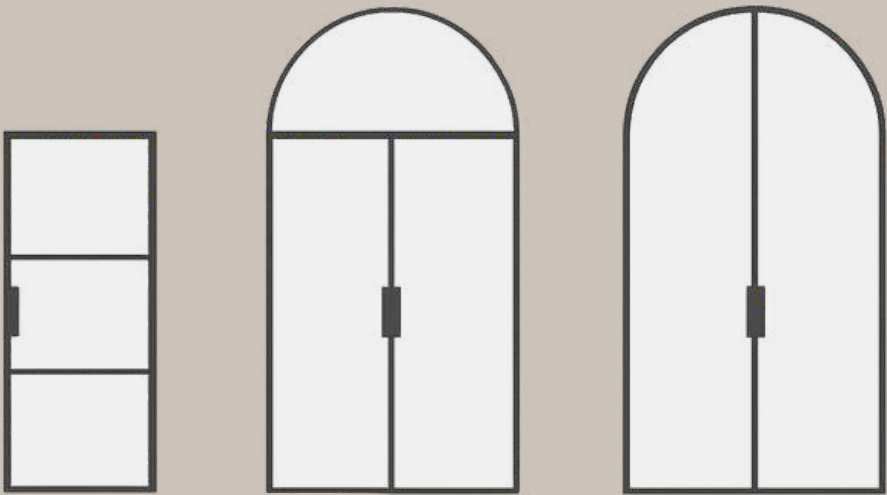

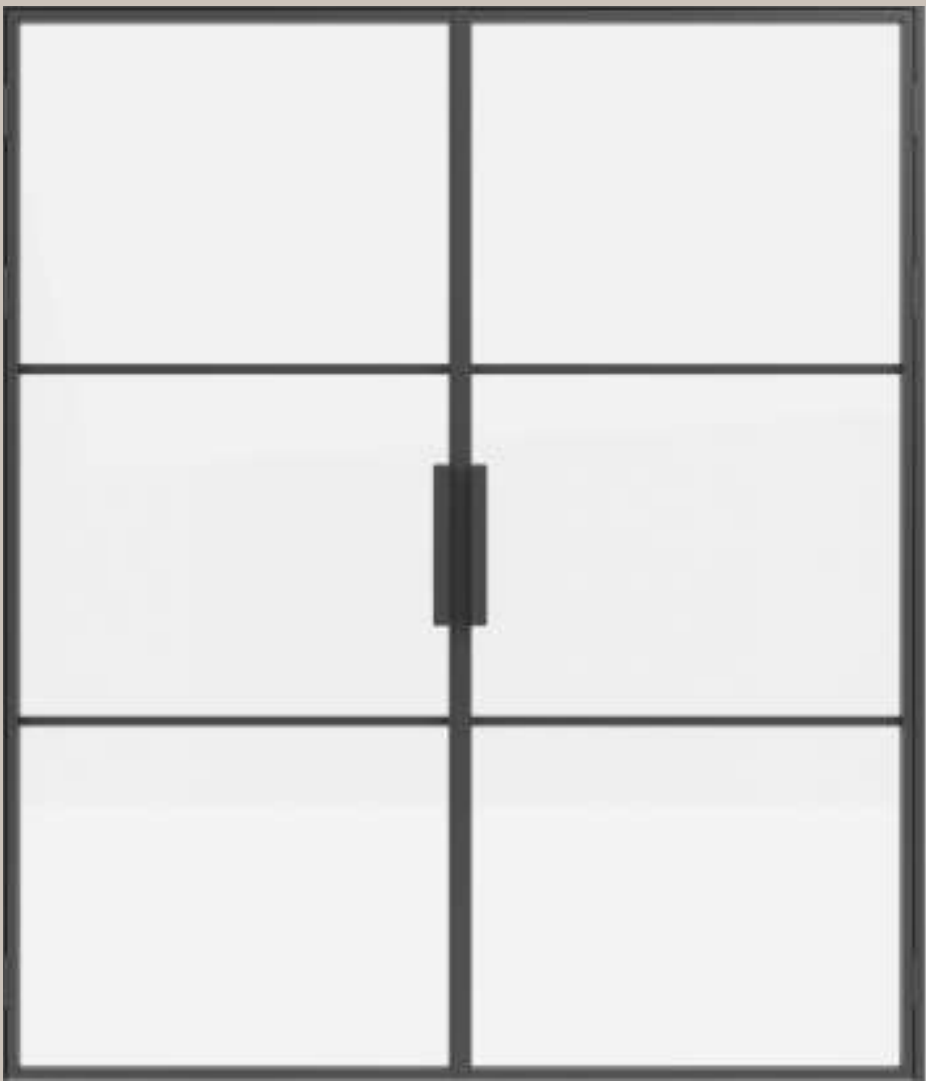

The Loft Slim Swing Collection is an architectural system designed to create precise, aesthetically refined single and double doors, which can also be combined with fixed side and top panels.

Doors from the Loft Slim Swing Collection are made from minimalistic 0.79 x 1.65-inch high-grade cold-rolled steel profiles.

Our steel doors are powder coated and fitted with premium-quality glass, ensuring both durability and elegance.

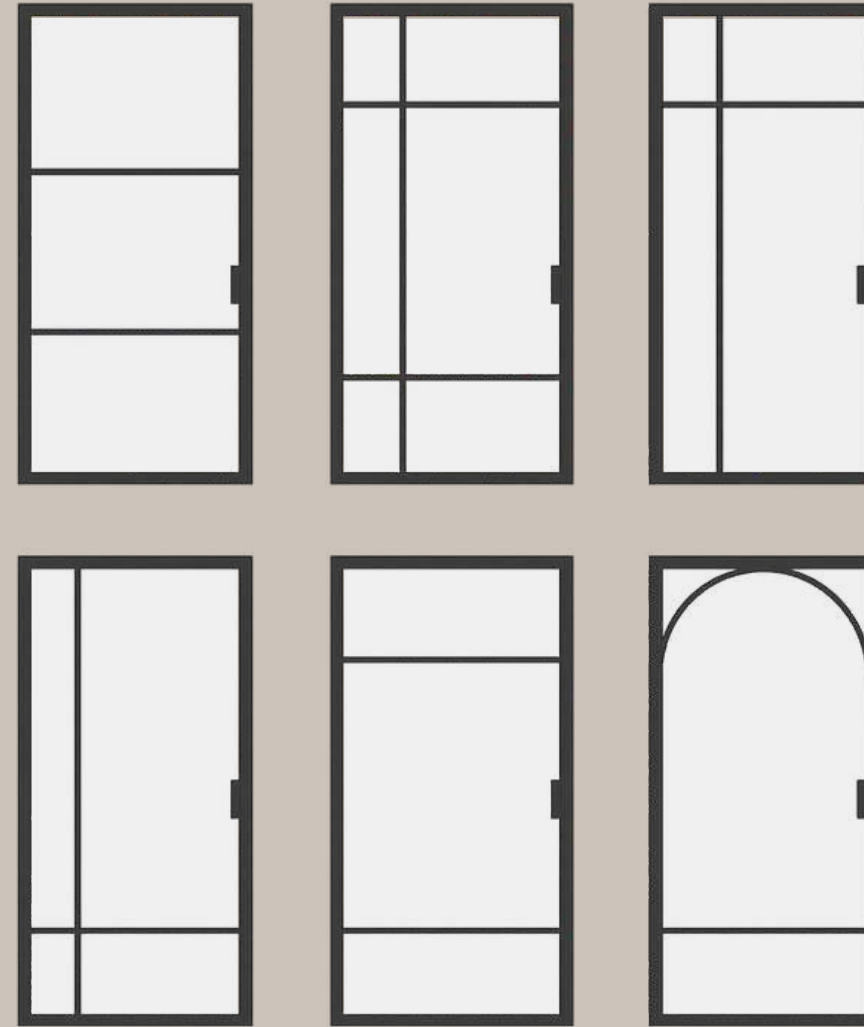

Fabrication limits:

	min	max
door leaf width [inch]	21.65	43.31
door leaf height [inch]	70.87	118.11

Hinged Doors

- Any dimensions possible
- Customizable bar designs
- Magnetic locking with pull handle or lock cassette with handle
- WC lock options
- Fixed panel configurations (side or top panels)
- Soft-close options

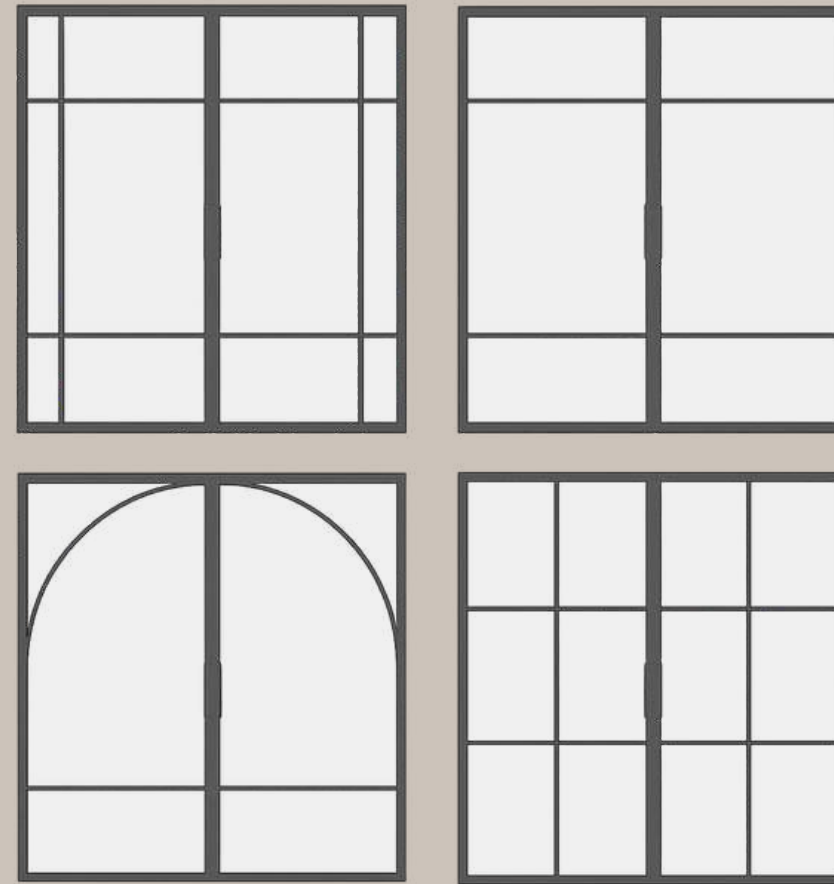

Bars design

The bar designs presented here are for inspiration - the full range is available in our online configurator.

Double Doors

- Any dimensions possible
- Customizable bar designs
- Magnetic locking with pull handle or lock cassette with handle
- Passive/active leaf bolt included as standard
- Fixed panel configurations (side or top panels)

Bars design

The bar designs presented here are for inspiration - the full range is available in our online configurator.

Swing Doors + Fixed Panels

The Deepo Loft Slim fixed panel system is defined by its minimalist lines and ultra-slim steel profiles, designed to create clear and elegant divisions within any space.

With no need for moving parts, fixed panels offer a practical and refined way to build partition walls or define zones while maintaining a sense of openness and light flow.

Thanks to the refined geometry and flexibility of the system, panels can be used individually or combined with hinged, sliding, or pivot doors to form complete steel-and-glass installations.

Fabrication limits:

	min	max
door leaf width [inch]	21.65	43.31
door leaf height [inch]	70.87	118.11

Swing Doors Installation Details

Deepo Loft Slim Swing doors are designed for quick and easy installation. The frame has pre-drilled mounting holes, which makes it easy to attach the door using standard screws and wall plugs.

Once the installation is complete, the holes are covered with Deepo plastic caps, painted in the same color as the frame for a clean and uniform finish.

LOFT SLIM
sliding doors

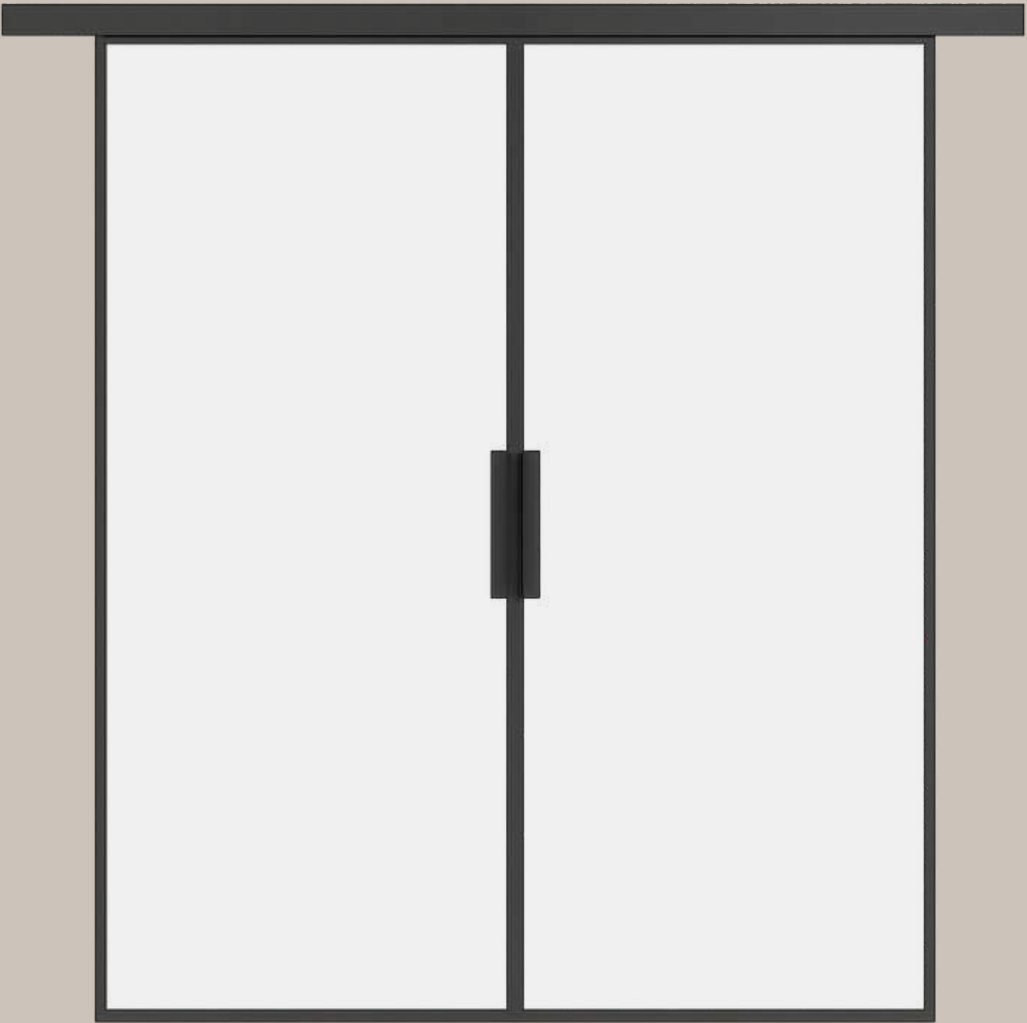

Sliding Doors

Deepo Loft Slim Sliding Doors are built with a 0.79 x 1.65-inch slim-profile system, designed to create elegant and functional sliding solutions. The system allows for single or multi-track configurations, offering flexibility for different spaces.

Floor guides ensure stability and prevent wobbling, while optional soft-close mechanisms add comfort and safety in everyday use. The doors can be mounted on the wall or ceiling, and additional fixed panels can be installed on the sides or above, allowing for custom layouts tailored to each project.

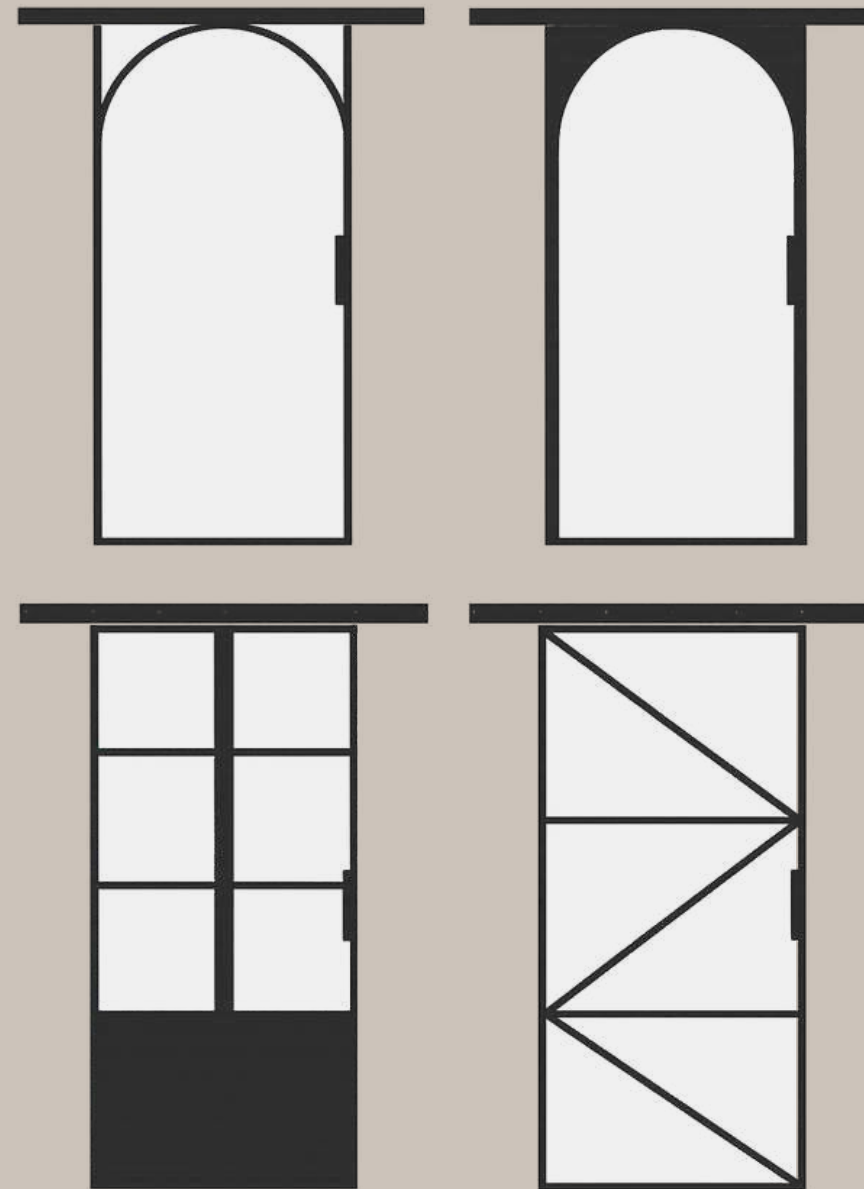

Fabrication limits:

	min	max
door leaf width [inch]	21.65	43.31
door leaf height [inch]	70.87	118.11

Sliding Doors

- Any dimensions possible
- Customizable bar design
- Soft-close as standard
- Ceiling or wall-mounted sliding rail
- Fixed panel options available
- No floor rail
- Pocket door options available

Bars design

The bar designs presented here are for inspiration - the full range is available in our online configurator.

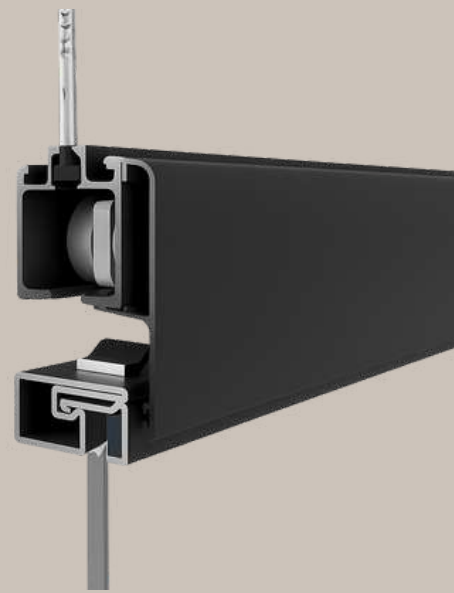

Sliding Doors

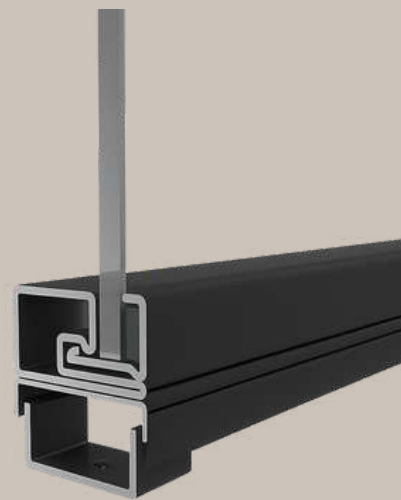

The Loft Slim collection offers two rail types: ceiling-mounted and wall face-mounted. Both options support multi-track systems, allowing multiple panels to slide independently for flexible layouts. On the floor, an invisible guide keeps the doors stable, preventing any unwanted movement or swaying.

Wall mounted sliding rail

Ceiling mounted sliding rail

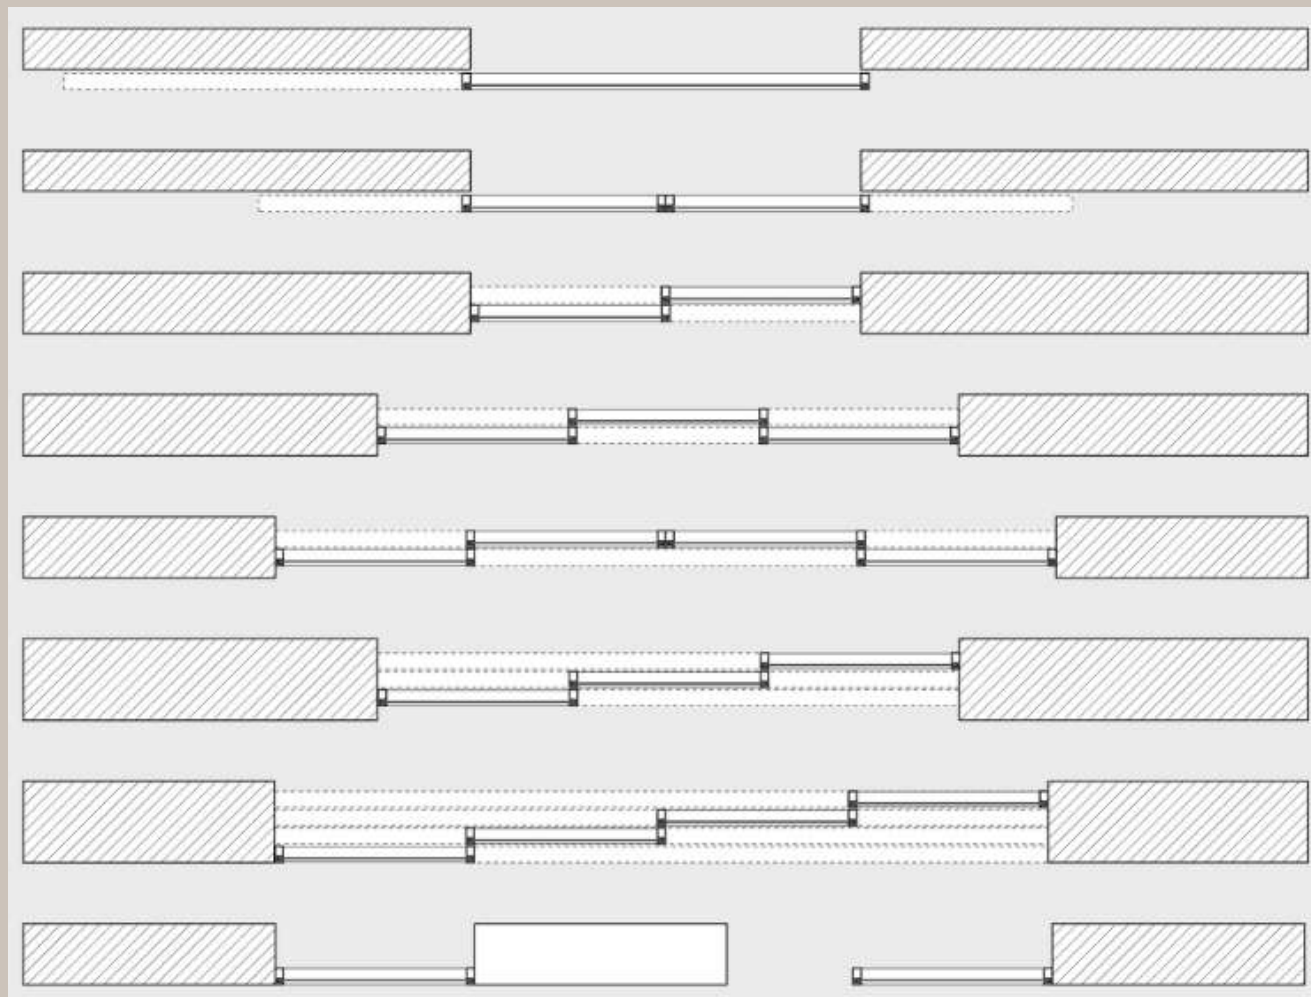

Concealed lower door guide

Sliding Doors

The Loft Slim sliding doors collection was used here to create a corner partition, forming a sliding wall that separates the home office area.

A multi-rail system allows all three panels to slide to one side, opening up the space when needed.

Sliding Doors Track & Pane Options

Sliding Doors + Fixed Panels

The Deepo Loft Slim fixed panel system is defined by its minimalist lines and ultra-slim steel profiles, designed to create clear, elegant divisions within any space.

With no need for moving parts, fixed panels offer a practical and refined solution for building partition walls or defining zones, while maintaining openness and natural light flow.

Thanks to the precise geometry and flexibility of the system, panels can be used individually or combined with hinged, sliding, or pivot doors to create complete steel-and-glass installations.

Fabrication limits:

	min	max
door leaf width [inch]	21.65	59.06
door leaf height [inch]	70.87	157.48

LOFT SLIM pivot doors

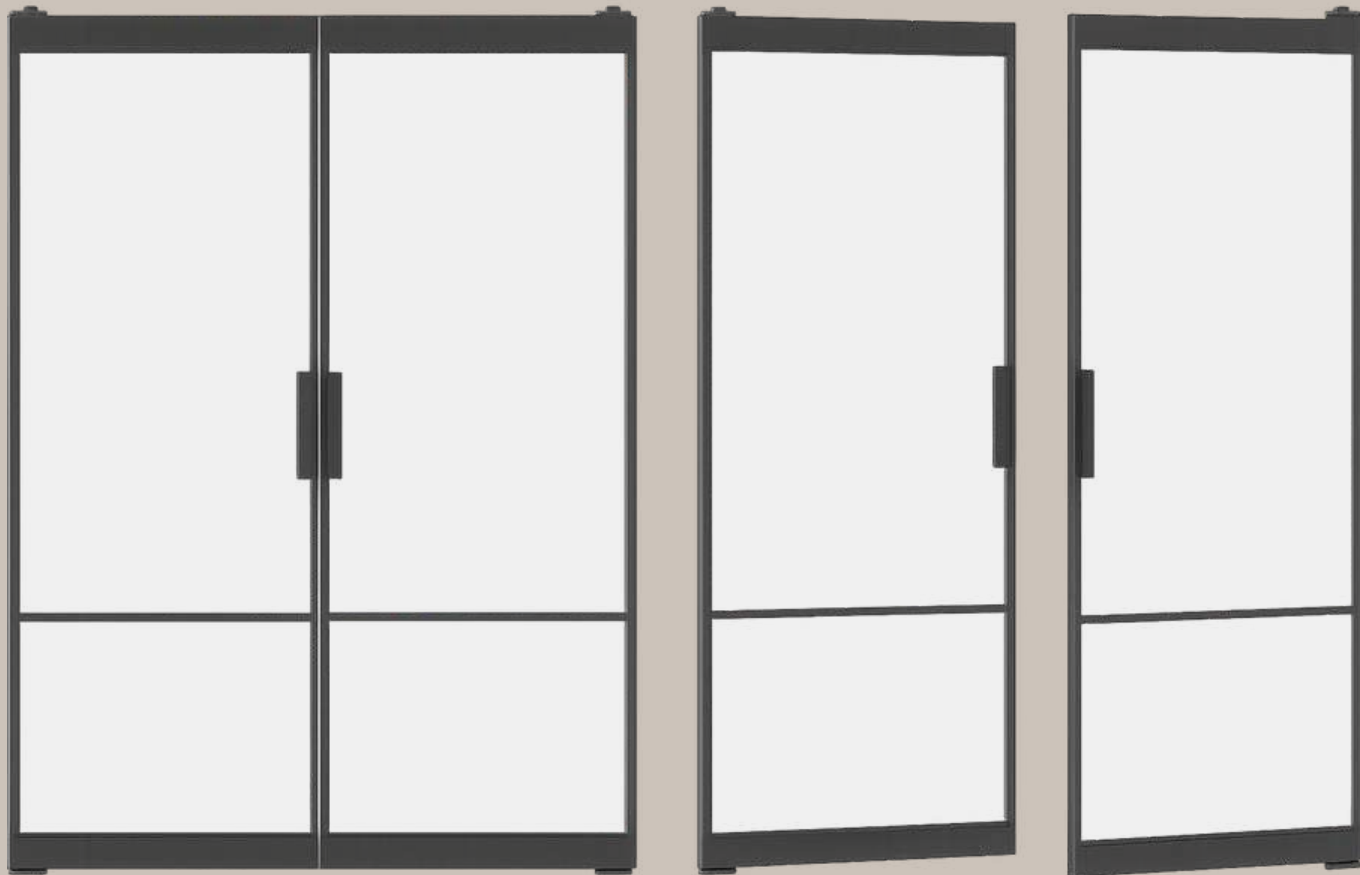

Pivot Doors

Deepo Loft Slim pivot doors offer a 180° opening range and soft-closing function for smooth, elegant operation.

We use Argenta Pivotica hinges in standard configurations and FritzJurgens systems for premium applications.

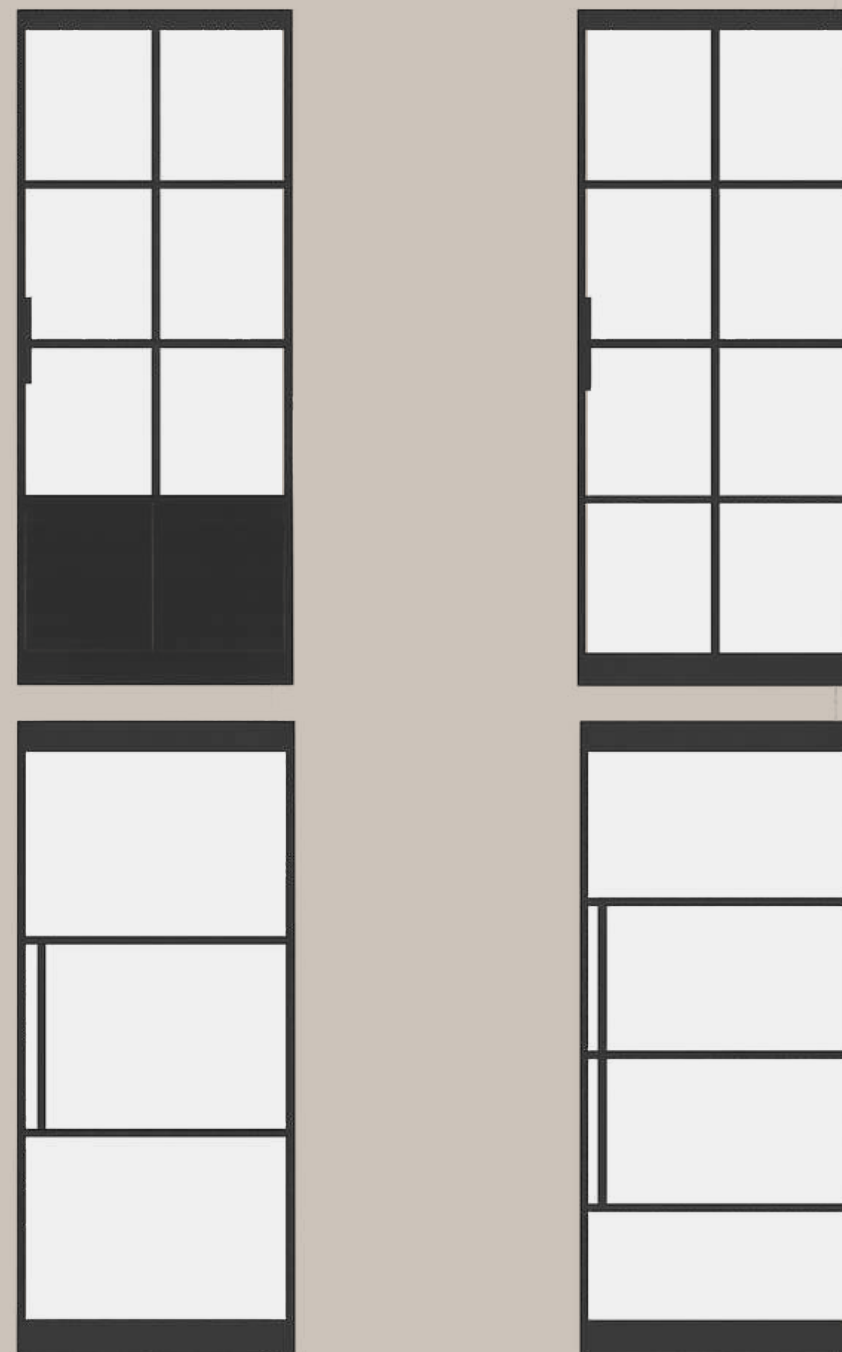

Available as single or double doors, with the pivot axis positioned either on the side or offset toward the center.

Designed for easy and efficient installation.

Pivot Doors

- Any dimensions possible
- Single or double door configuration
- Customizable bar designs
- Fixed panel options available

door leaf height [inch]	70.87	118.11

Pivot Doors + Fixed Panels

Deepo Loft Slim Pivot Doors combine modern design with flexible configuration. The system allows for fixed panels to be added on the sides or above the door, creating larger glazed compositions that bring more natural light into the space. This makes pivot doors not only a functional entry solution, but also a striking architectural feature that can be tailored to each individual interior.

Loft slim
fixed
panels

Fixed Panels

The Deepo Loft Slim Fixed Panel system is defined by its minimalist lines and ultra-slim steel profiles, designed to create clear and elegant divisions within a space.

With no need for moving parts, fixed panels offer a practical way to build partition walls or separate zones while maintaining openness and light flow.

Thanks to the refined geometry and flexibility of the system, panels can be used individually or in combination with hinged, sliding or pivot doors to form complete steel-and-glass installations.

Fabrication limits:

	min	max
door leaf width [inch]	21.65	43.31
door leaf height [inch]	70.87	118.11

options

Bar Types

Deepo Loft Slim offers several division bar options, allowing you to tailor the look of each door or partition. Stick-on bars are made from a special aluminum profile with hidden adhesive and tape, ensuring a clean surface with no visible fixings. For a more traditional solution, you can choose welded bars combined with aluminum, providing a solid and permanent bar effect.

Another option is stick-on steel bars, which make it possible to create arched or custom shapes, adding distinctive character to the design.

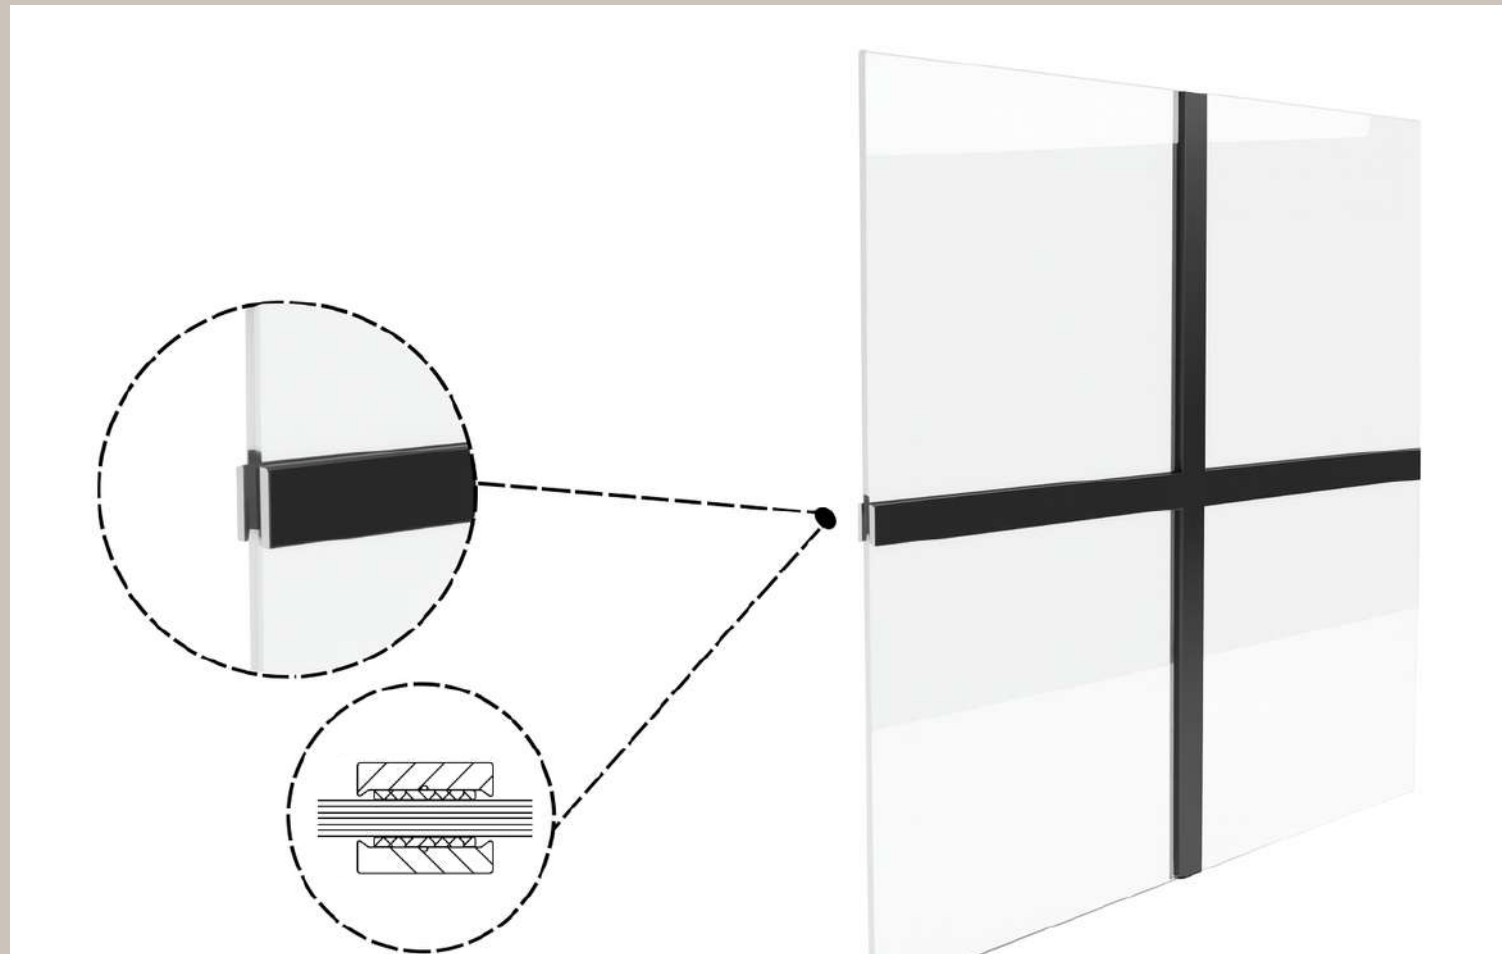

Stick-on aluminum bar

Welded steel bar + aluminum stick-on bar

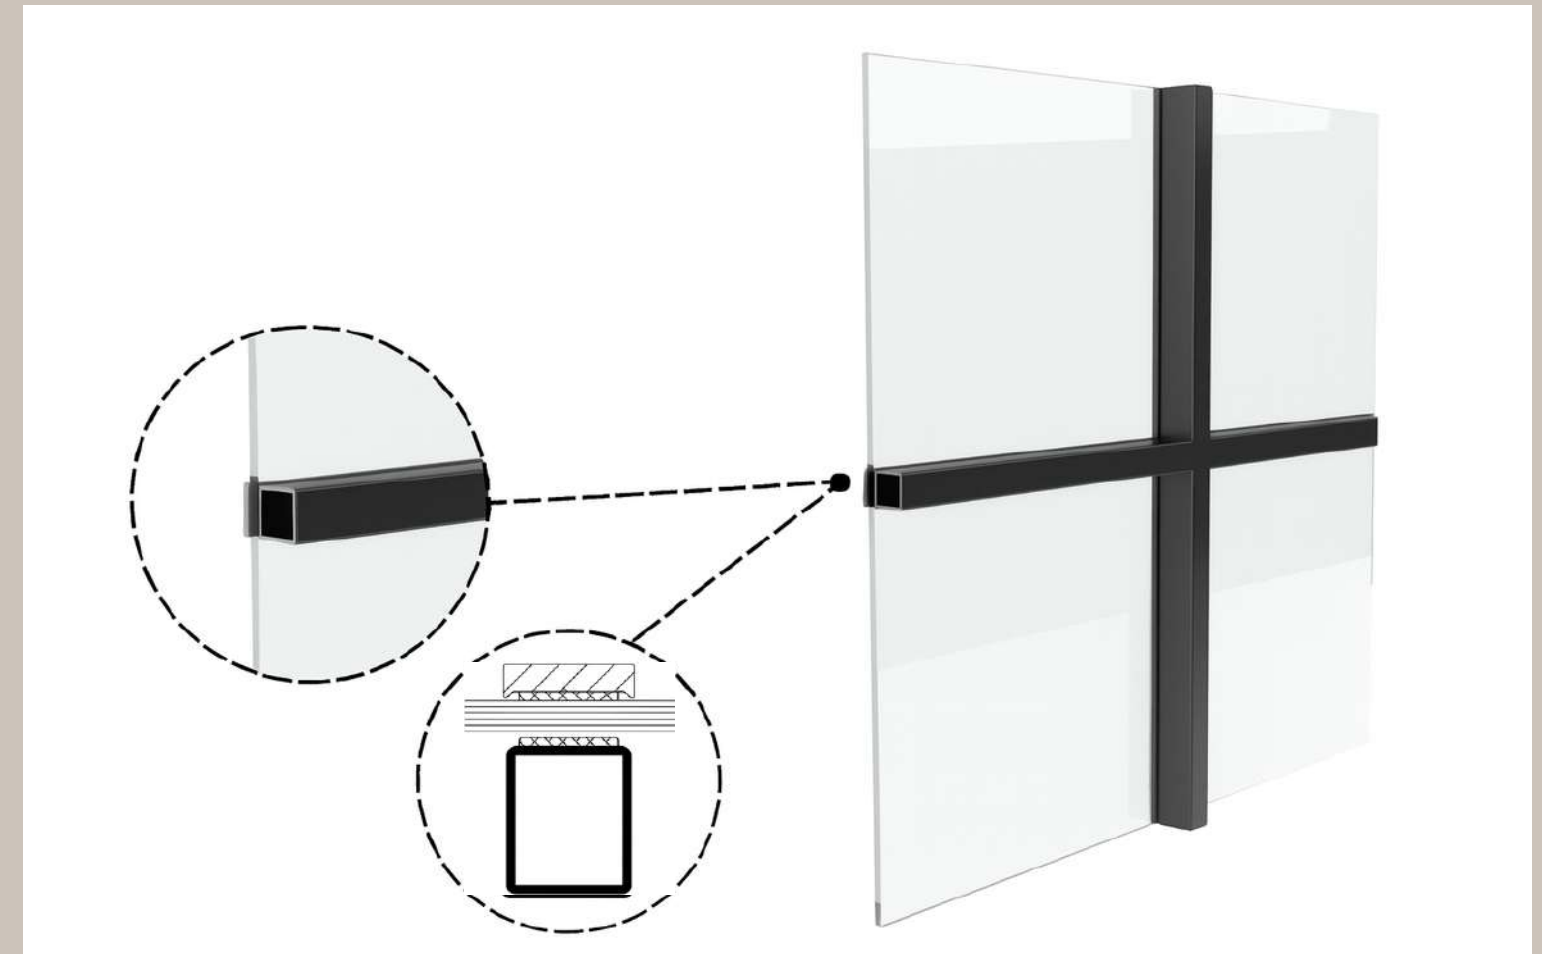

alu bar

- stick-on bar
- 0.79-inch width
- 45° and 90° joints

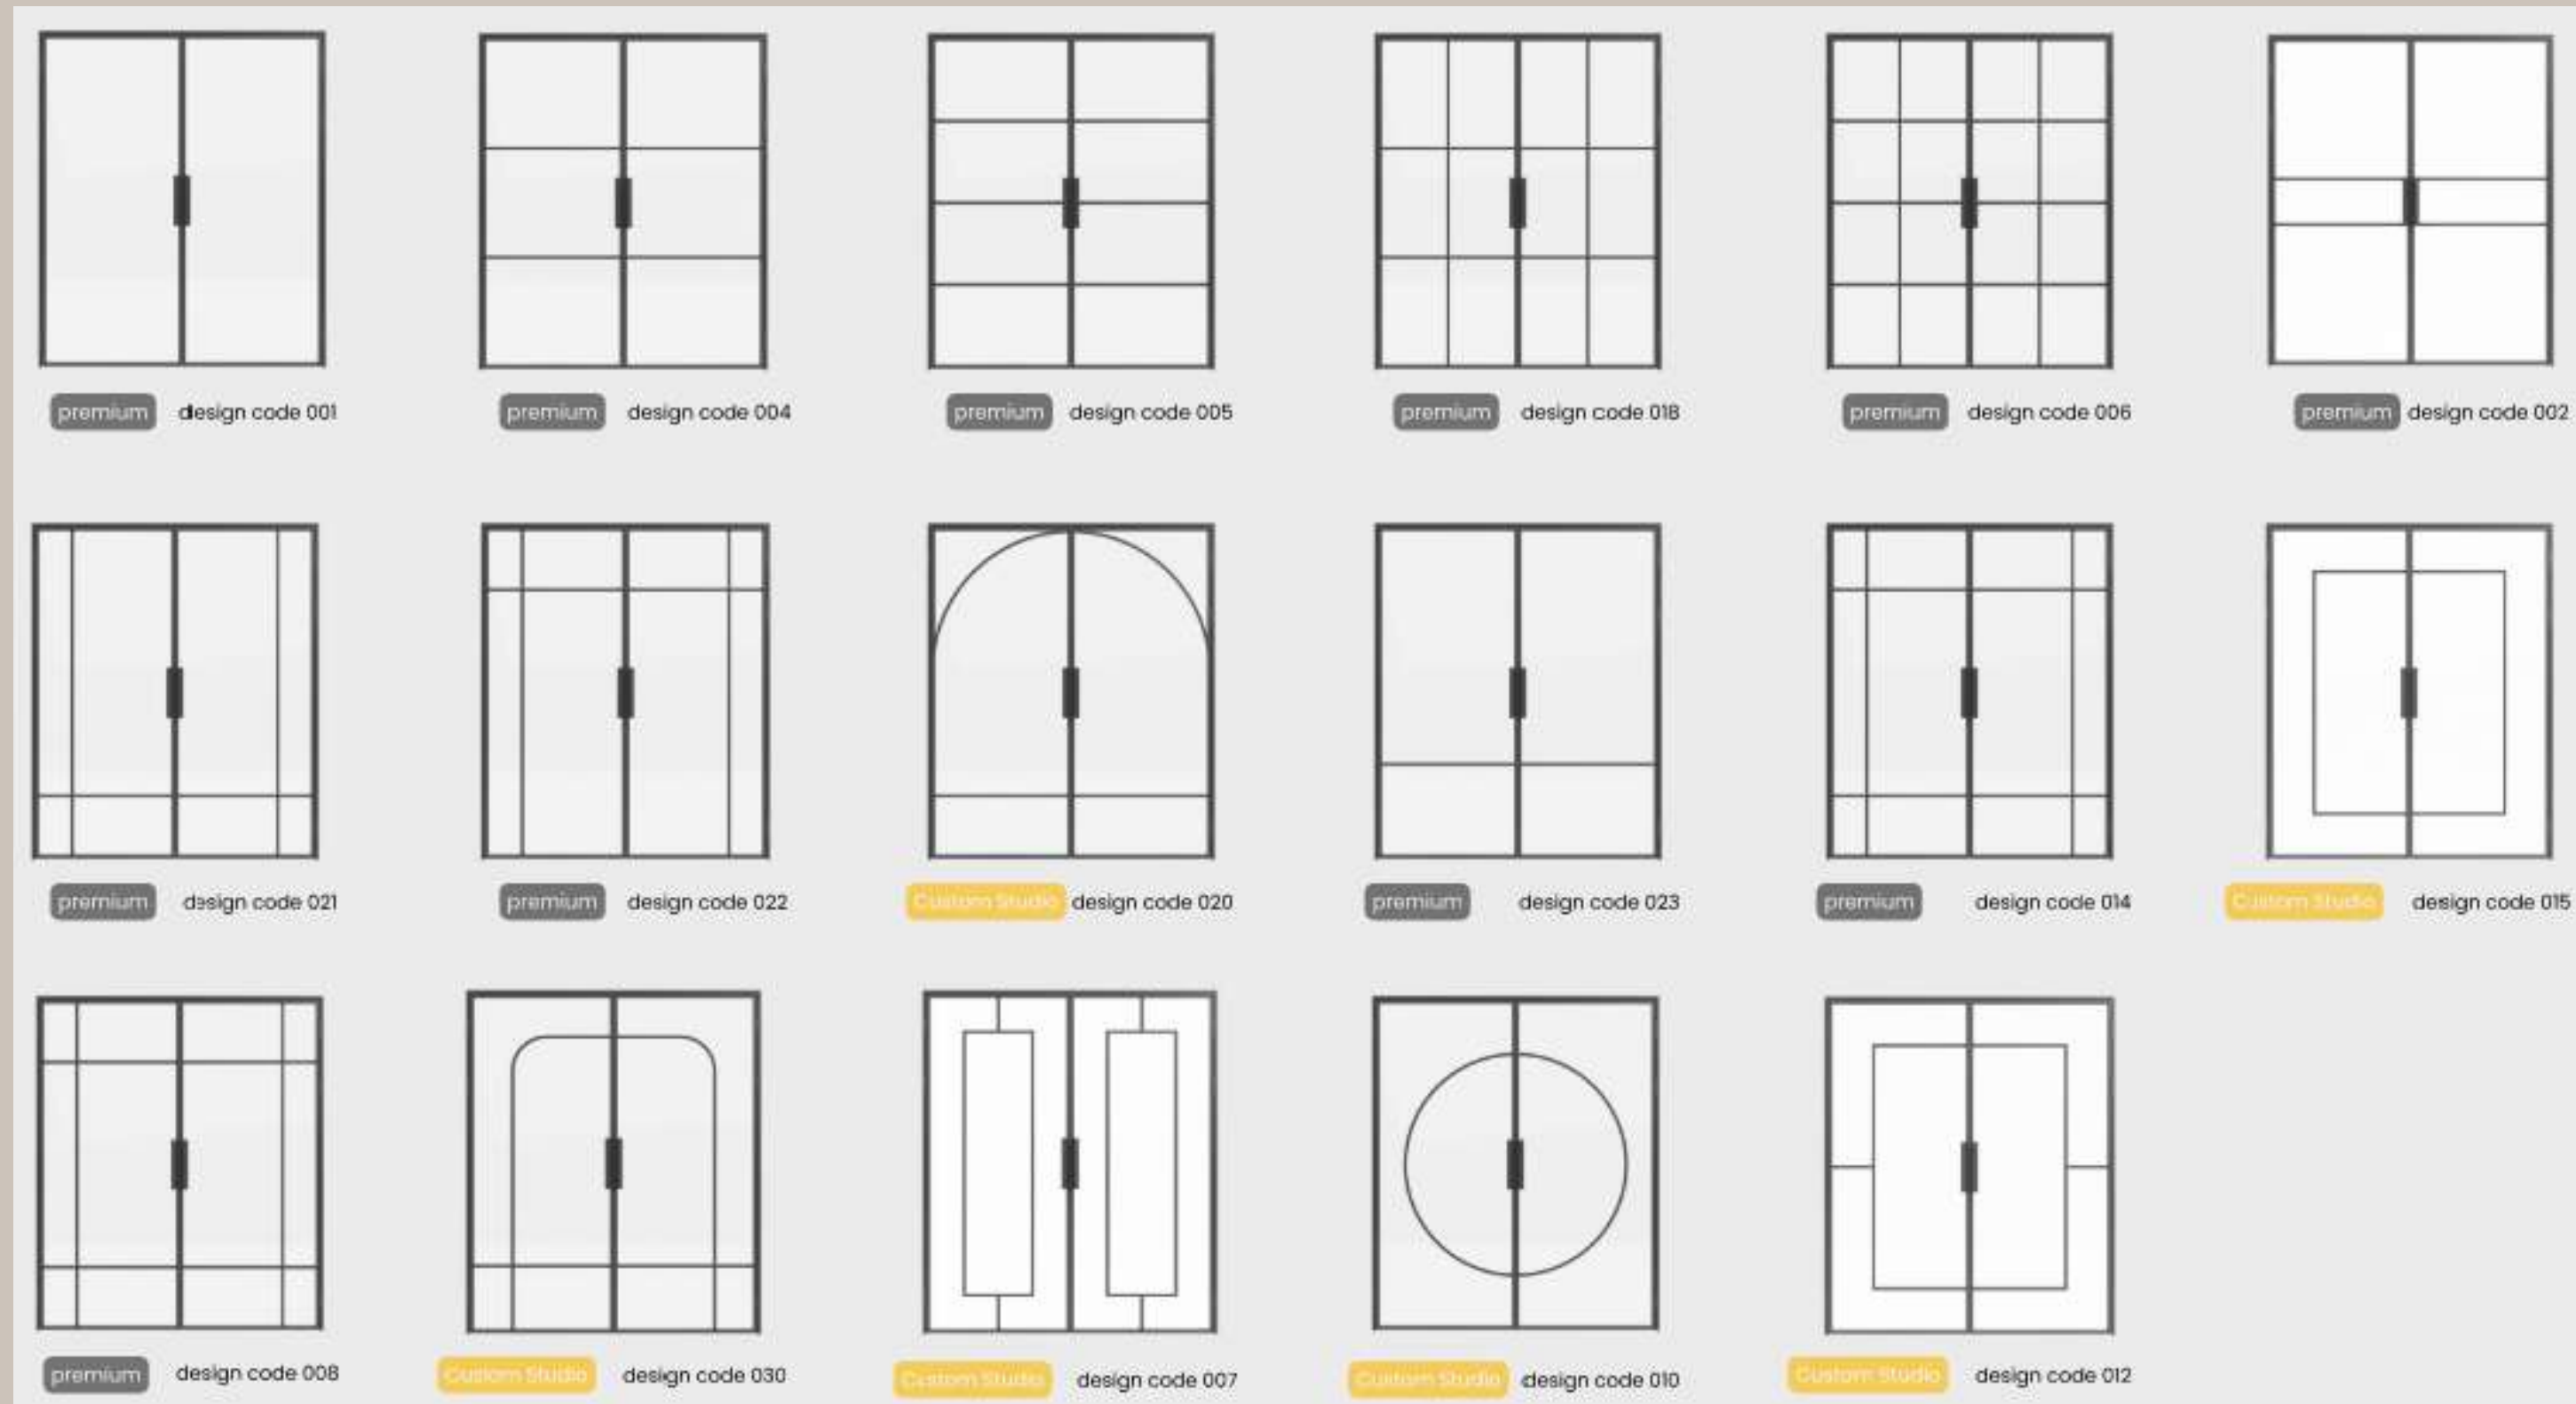

alu bar + steel

- stick-on bar on side (0.39-inch, 0.79-inch)
- welded construction bar on second side
- 0.79-inch width
- 45° and 90° joints

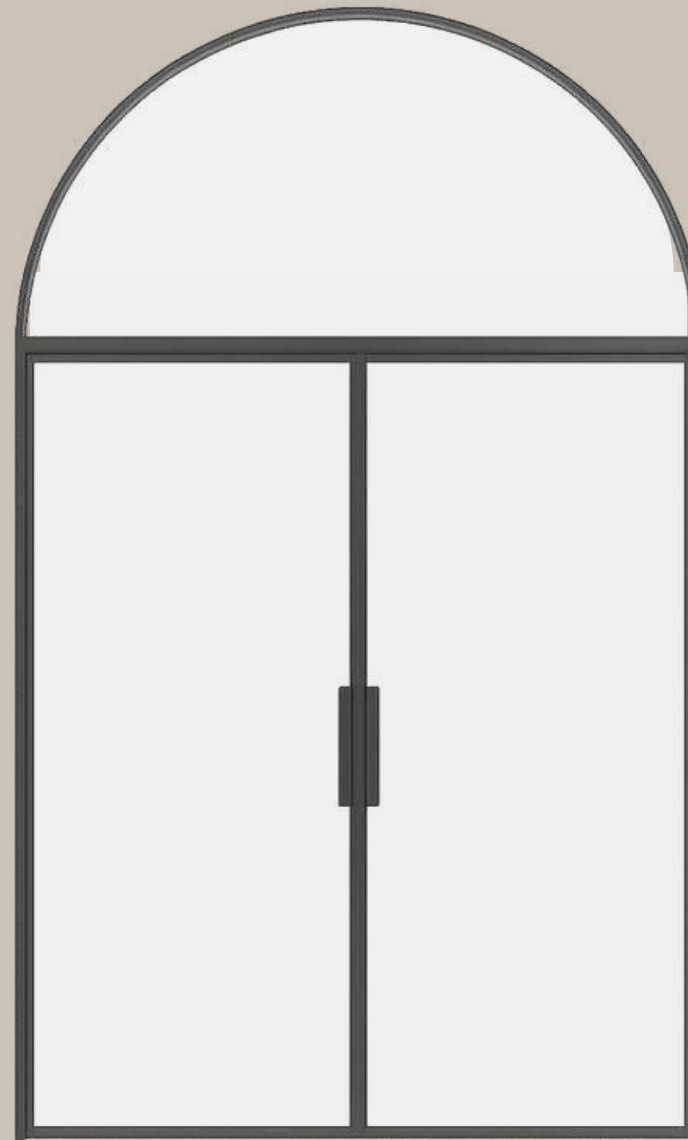

Bars Layouts

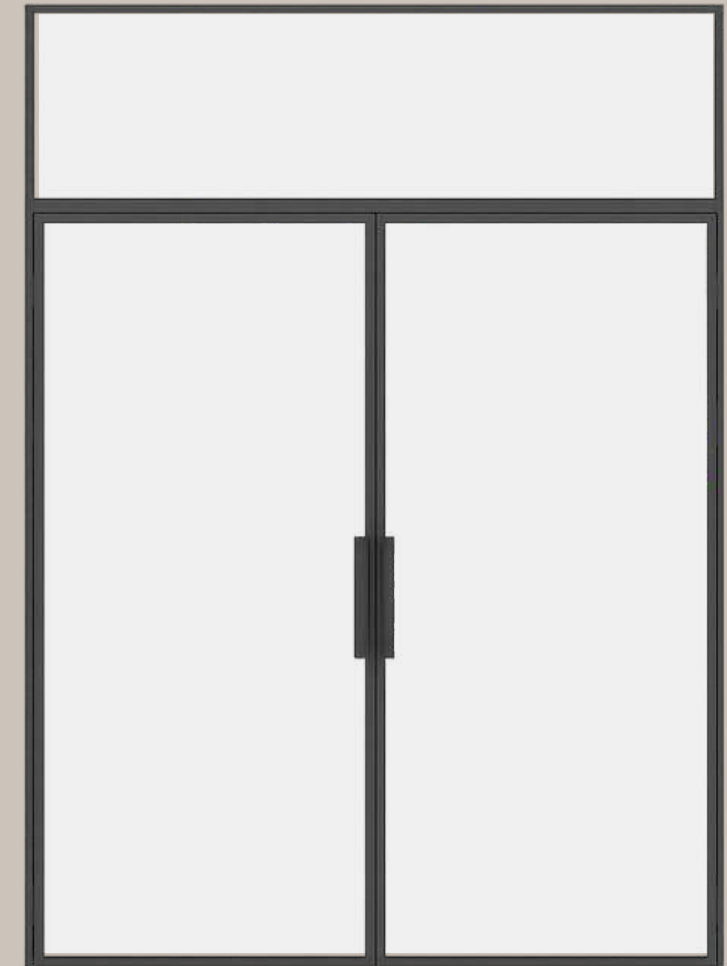

Fixed Panels

All Deepo Loft Slim Doors are fully compatible with fixed panels, allowing you to extend the system beyond a single door. Fixed panels can be square, triangular, or arched, giving architects and designers freedom to create unique layouts that reflect the character of the space. This flexibility makes it possible to design both simple partitions and striking architectural features using the same slim-profile system.

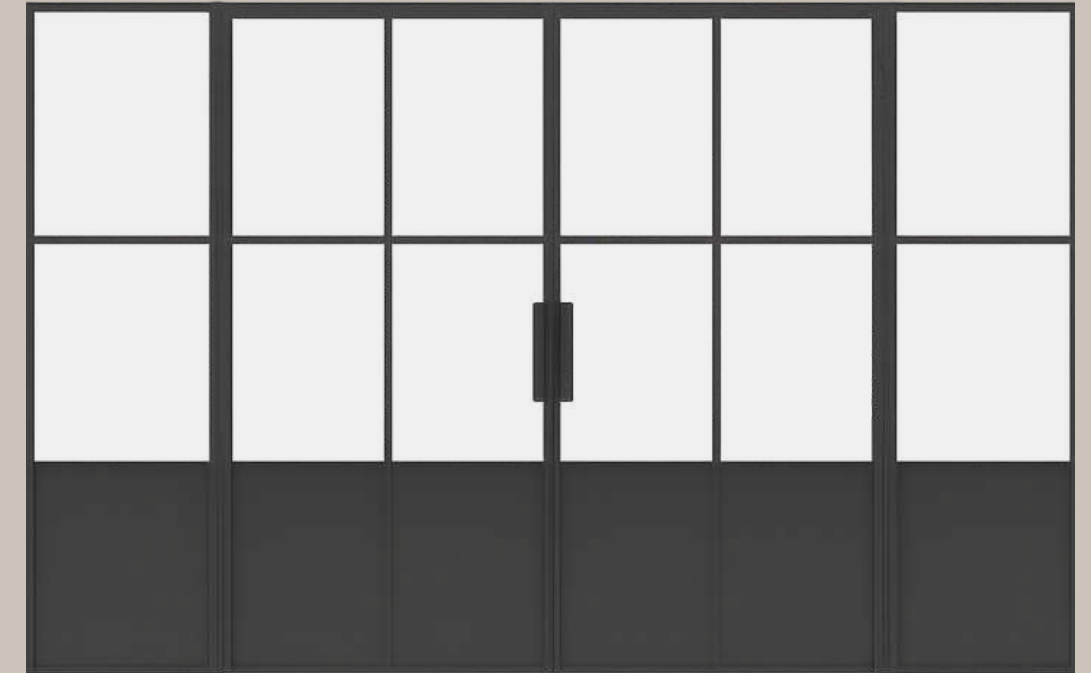

Arched panel details

Standard panel details

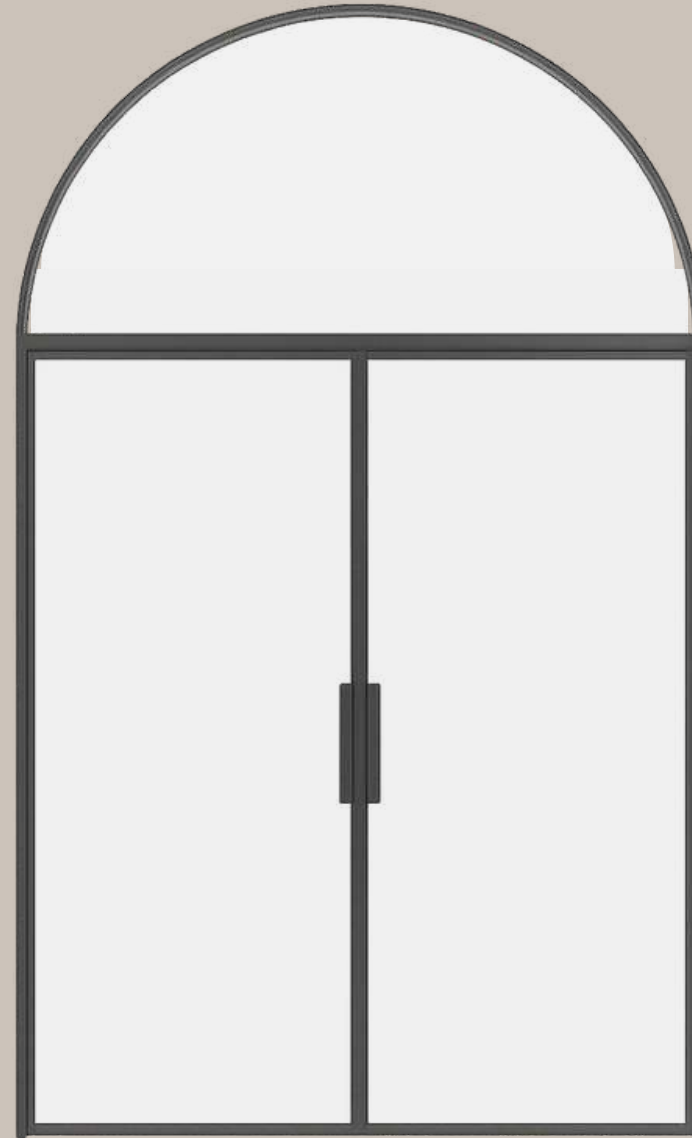

Kick Panels

Kick Panels are protective steel plates mounted directly onto the door surface. Made from 100% steel and finished with durable powder coating, they combine strength with a clean look. The dimensions are fully customizable, allowing each panel to be adapted to specific project requirements while ensuring long-lasting protection in high-traffic areas.

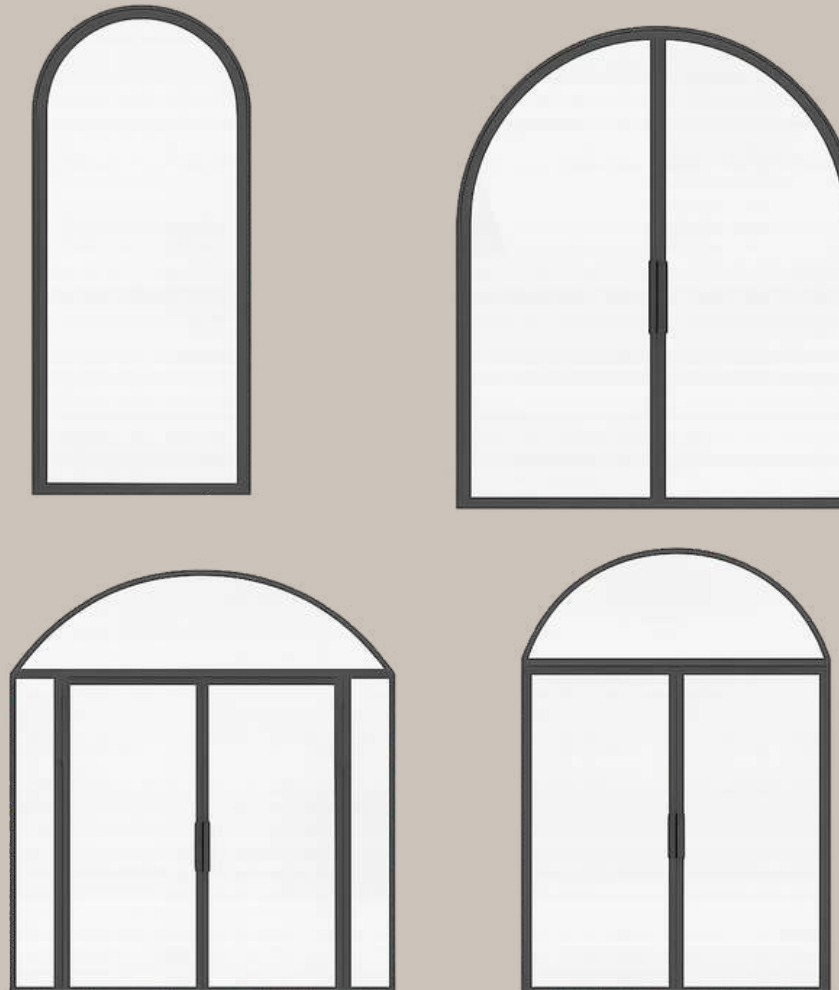

Arched Elements

Loft Slim Arched Elements add a distinctive architectural touch to the system. They can be designed as arched door leaves, fixed partitions or fixed panels placed above doors. This allows for elegant curves that soften the geometry of steel frames while maintaining the signature slim-profile look. Radius limits apply and are defined individually for each project, ensuring both aesthetics harmony and structural reliability.

Arched Doors

- Any dimensions possible
- Single or double door configuration
- Customizable bar design
- Magnetic locking with pull handle or lock cassette with handle
- Passive/active leaf bolt as standard
- Fixed panel options (sides or top panels)

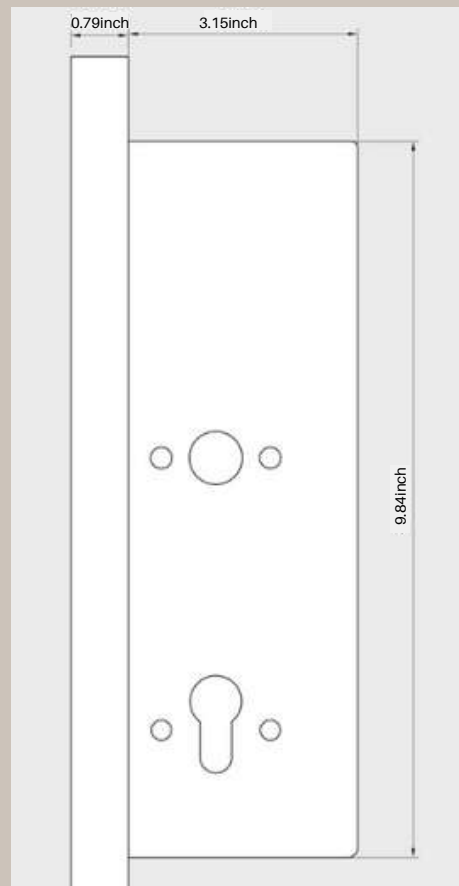

Construction

Arched doors are available in multiple design options. The design process requires engineer consultation beforehand.

Lock cassettes

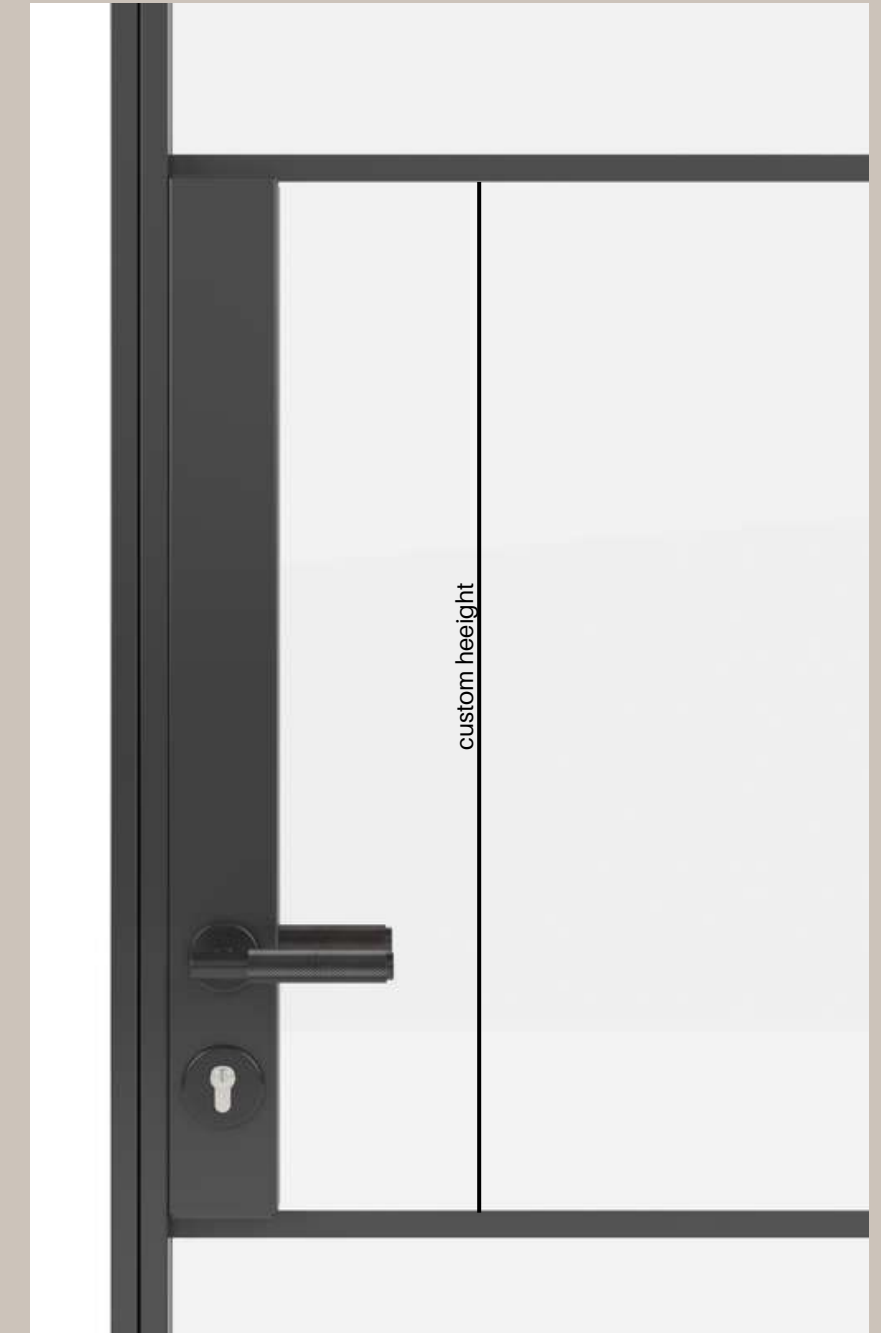

Deepo Loft Slim Lock Cassettes are steel components designed to house locks within the system. They are available in both standard and custom versions. The standard cassette comes with fixed dimensions, while the custom option offers for full flexibility - for example, allowing the cassette to be precisely aligned with division bars or adjusted to fit to a specific design layout. This ensures a seamless, integrated appearance without compromising functionality or performance.

Standard lock-cassette dimensions

Standard lock-cassette

Custom lock-cassette

Standard lock cassette

Craftwood – Your Architectural Dealer and Project Partner

✓ Design and Technical Support

From concept to completion, we help select the ideal solutions for every project. Our technical team supports architects at every stage – from system selection to installation details.

✓ Comprehensive Documentation for Architects

We provide complete project materials – CAD drawings, BIM models, technical sheets, and material samples. Everything you need to easily integrate our products into your architectural plans.

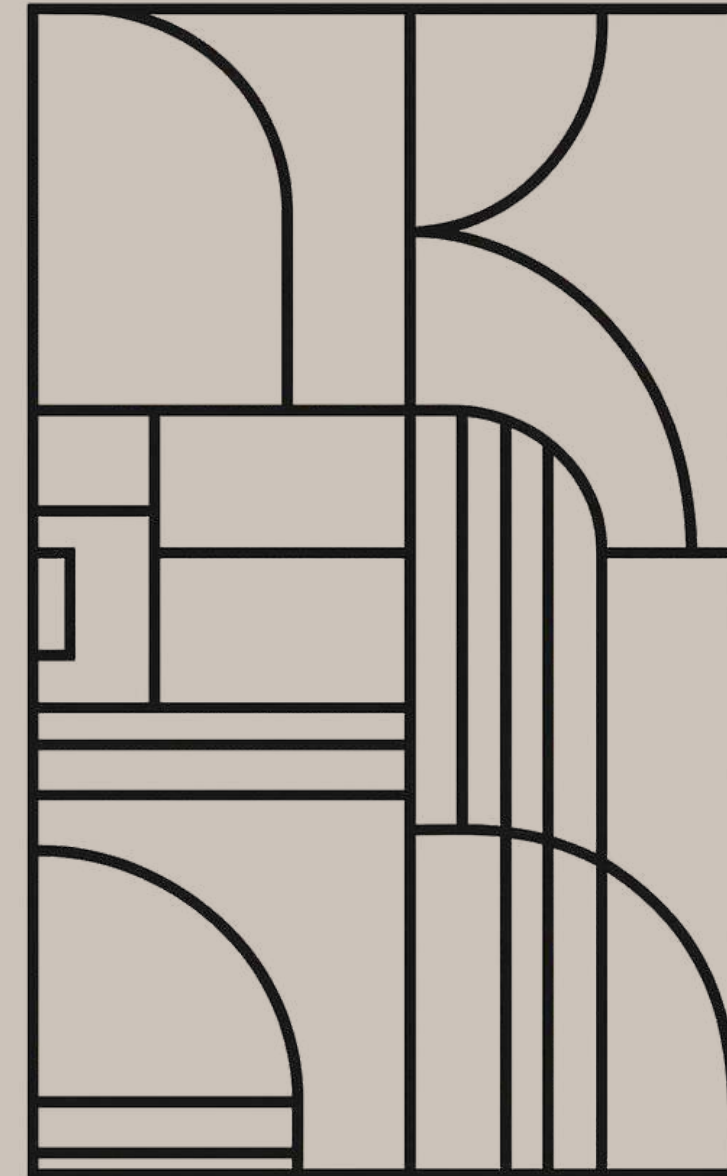

✓ Flexibility and Customization

Each order is individually tailored – colors and dimensions to glass types and hardware details. We handle both standard and bespoke projects, always ensuring the highest quality of craftsmanship.

✓ Fast Quotation and Execution

We guarantee quick quotations and a smooth process from design to installation.

Every project begins with you.

Every profile has a reason.

THANK YOU AND STAY TUNED...
